

IN THE SPECIFICATION

On page 12, paragraph beginning on line 29, please amend as follows:

In the present example, the width 61 of a moveable section 53 is 100 μm , whereas the length 63 is about 800 μm . The first and second foil sections are each 50 μm wide, thus each moveable section 53 has 16 foil sections. The width 64 is 100 μm . In an embodiment, 62 denotes the space between the horizontal sections of the double cross configuration of a flexible foil 52.
